FIND OUT MORE
ABOUT THE
SIDAS WORLD

A PARTNER FOR EVERYONE WHO WANTS TO GIVE THEIR FEET THE COMFORT AND PROTECTION THEY NEED FOR EACH NEW SPORT AND EACH NEW DAY.

The success of Sidas' various projects is achieved by combining our passion for sport with the expertise of athletes, orthopaedic centres and sports experts.

Sidas offers a wide range of products: insoles, foot protections, shoes, ski liners, socks, thermal socks and accessories.

SIDAS designs 360° foot care products, including comfort solutions adapted for all types of sport and all types of wear.

Podiatech offers a full range of equipment and consumables for podiatry and foot care, in order to meet the needs of foot care professionals and their patients.

Therm-ic develops thermal products to help users stay warm when participating in winter sports and activities, allowing them to get the most out of their pursuits.

Corpus.e is one of the most innovative suppliers of technologies in the field of digital sales. Its objective is to connect feet with shoes, based on their volumetric data. Its Shoo IQ platform is unique in that it enables the matching of feet with shoes, regardless of which measuring tool is used.

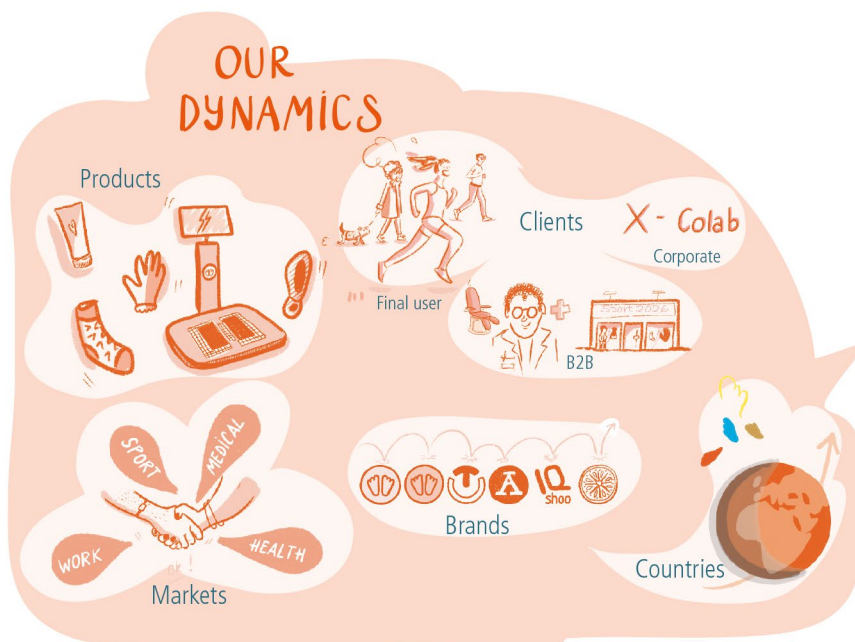

The Academy is born from the last 40 years of experience of Sidas world. Sidas and Podiatech have always trained their clients to be able to deliver the best custom products. The Academy wants to go further and share with you all our experience. Today the academy wants to be more... and share its experience, thanks to its network gathering the best world experts in their fields.

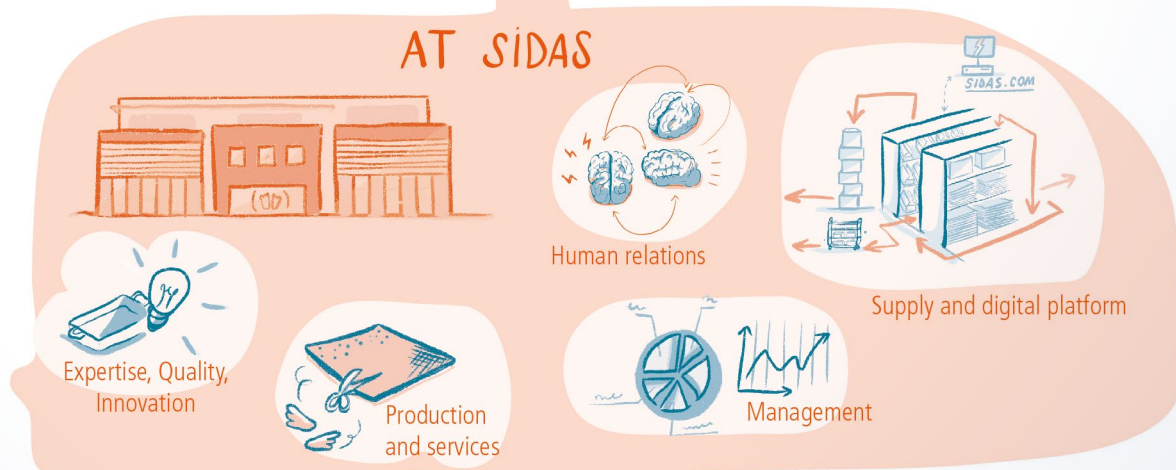

Serving wellness and natural health since 1977. We develop high-performance natural care products in France, respecting balance and nature. With **Qenoa** find comfort and vitality. Optimise and preserve your health in a harmonious way.

FONDATION **SIDAS** **WORLD**

Abritée par la Fondation de France

“Beyond the performance and satisfaction of all, a company must undertake all its responsibilities on an environmental and human level.

The SidasWorld Foundation will take action on the environment, by supporting concrete projects on climate and biodiversity.”

Let's take action together !

The word of our directors Jean-Pierre Delangle
and François Duvillard.

Find out more about the Sidas World Foundation, which aims to support sustainable development projects that contribute to the reduction of carbon emissions and support the preservation of ecosystems around the world.

THE FOUNDATION IS PART OF SIDAS WORLD'S RAISON D'ÊTRE

Born from the Sidas company desire to take action for the planet through concrete climate and sustainable development projects, the Foundation mission is to make a sustainable contribution towards the preservation and rehabilitation of natural ecosystems.

OUR MISSION

The purpose of the fund is to support sustainable development projects that help reduce carbon emissions and preserve ecosystems. It can also support initiatives to raise awareness and inform the public about sustainable development.

WHY DID WE SET UP A FOUNDATION ?

- ▶ To give to committed partners who are carrying concrete projects in our territories.
- ▶ To raise funds.
- ▶ To raise employees awareness on sustainable development issues.
- ▶ To act together, involving our entire ecosystem from supplier to end-consumer.

OUR FIELDS OF ACTION

The primary focus of the Fondation Sidas World is to support projects aimed at improving natural carbon capture:

- ▶ Planting.
- ▶ Forests adaptation, peatlands, mangroves, etc.
- ▶ Restoration of natural areas.
- ▶ Protection of biodiversity.
- ▶ Awareness-raising and training on these themes.

SIDAS HAD BEEN FOUNDED IN 1975, IN THE PART OF THE FRENCH ALPS. THE 3 FOUNDERS LOIC DAVID, GABRIEL PELLICOT AND JACQUES MARTIN, HAVE THE IDEA OF THE FIRST CUSTOM INSOLES BY WALKING IN THE SAND OF AN HAWAIIAN BEACH. SINCE THERE SIDAS NEVER STOP INNOVATING AND DEVELOPING IT EXPERTISE AND KNOW HOW FROM THE SKI TO THE RUNNING AND FROM CUSTOMIZED INSOLES TO SOCKS, FROM DIGITAL ANALYSING TOOLS TO SOLUTIONS FOR THE SHOES.

As a feet expert and sport expert, we are able to provide the best solutions for any kind of consumers and sports activities, from socks to insoles and boot accessories. Our development are based on our 45 years of fitting expertise, digital database of more than 500 000 feet scanned and a network of foot and sport experts around the world. Our mission is to provide solutions for the consumers in order to have them focus on their activity.

As a brand, we want to be committed to the consumers, the distribution and the sports. As a brand we want to act responsibly to our ecosystem.

Focus on your activity, we take care of your foot.

THE FIT PROTOCOL IS A UNIQUE PROTOCOL MADE TO SERVE THE END-CONSUMERS; ANSWERING THE NEEDS OF RETAILERS AND INTEGRATING THE BRANDS IN THE PROCESS.

FOR 40 YEARS, OUR KNOW-HOW, OUR EXPERTISE FOR TRAINING AND OUR RETAILERS FOLLOW UP; HELP US TO CREATE A PROTOCOL THAT GUARANTEES THE BEST EXPERIENCE FOR CONSUMERS, BRANDS AND RETAILERS.

A win win win process between consumers, retailers and brands.

- CONSUMERS: feel good because they have great fitted shoes.
- RETAILERS: follow a specific proven protocol to improve their running business through KPI (Key Performance Indicators).
- BRANDS: can count on the retailer to sell their products correctly, responding to consumer needs.

TO BE PART OF THE FIT PROTOCOL PROGRAM:

- Mandatory products
- Mandatory specific trainings
- Special marketing & communication tools
- Special business conditions

MEASURING AND ANALYSIS

THE FOOT MEASURING TOOL TO THE DIGITAL PLATFORM shoo^{IQ}

FEET REVELATOR IQ

#110V ABFEETREVEIQ24
#110V 128874101

The new Feet Revelator IQ is a mechanical foot-measuring tool that measures the length, width and arch type of the right and left foot separately. It comes with a QR code for easy access to the new Shoo Lite app on the customer's phone. The app provides more detailed information about the measurements.

CONNECTED

A QR code on the device can connect the smartphone of the customer to the Shoo IQ lite platform to store the measure of the feet and provide a more accurate information to the customer

INDEPENDANT MEASUREMENT RIGHT AND LEFT

The length and the width are measured independantly thanks to the new construction of the Feet revelator for a more precise information and so a better recommendation.

MEASUREMENT

Mechanical structure that can easily measures the length and the width of the feet of the consumer. A dedicated film construction can provide the footprint of the arches to determine its type.

OUR AIM: TO GIVE YOUR CLIENTS AN IN-STORE EXPERIENCE, IN ORDER TO ENHANCE YOUR BUSINESS AND SERVICES.

The plate is equipped with a 360° camera that scans your feet and legs up to the knees, in order to obtain a 3D model of them. You can see all the measurements of your feet (length, width, thickness), ankles and calves on the screen. The system makes it possible to simulate the fitting of a customised insole and shoe whilst taking into account the thickness of the sock.

After connecting to the database of footwear sold in your shop and a chat with your customer; Feetbox® 3D makes it possible to simulate fitting shoes that are suitable for your customer's feet, in accordance with their constraints, needs and budget by virtually fitting the shoe on the feet, it also makes it possible to see the different areas where the feet are deformed that need to be considered. An unrivalled experience for the client and it saves you time. Using Feetbox® 3D gives the consumer a unique experience.

3D

WINTER 3D MERINO

CSE3DWINMERI20
319652000

The Winter 3D Merino insole was designed to provide maximum comfort and warmth during winter activities. The insole's anatomical design helps distribute the load underfoot, limiting pressure points. The EVA foam heel absorbs any shocks related to your chosen activity. The merino covering and insulating foil provide warmth and insulation, even during low intensity activities.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. EVA foam: Instant comfort for the entire foot
2. Merino covering: Warmth and odour absorption
3. Aluminum foil: Insulation
4. EVA shell: Foot support and stability
5. EVA heel pad: Cushioning

WINTER 3D PERFORMANCE

CSE3DWINPERF20
319651000

Inspired by our developments for world cup skiers, the Winter 3D Performance insole has been designed to improve pressure transmission for the skier and heel stability within the boot. These factors allow the skier to be more precise when carving while also providing improved comfort. The insulating aluminium film and EVA foam provide comfort and warmth for the feet, which is an additional bonus for day-long skiing sessions.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. TPU shell: Foot support and pressure distribution
2. EVA foam: Comfort
3. Microfibre covering: Comfort and anti-slip
4. Aluminum foil: Insulation
5. Heel reinforcements: Forefoot stability
6. EVA heel pad: Shock absorption

INSOLES READY TO FIT

3D

NORDIC 3D

CSE3DXCNORD17
311900000

Preformed insoles specially designed for Nordic skiing (classic and skating). Get the most out of your sport during the different phases: propulsion, gliding and manoeuvring. These light and comfortable insoles provide you with precision and momentum. The 3D shell gives stability to the foot, and maximises stability while gliding and manoeuvring. The kick pad optimises and boosts the propulsion phase.

SIZES
XS-S-M-L-XL-XXL

FEATURES

1. Top cover: Anti friction's resistance
2. Comfort layer
3. 3D shell: Stability & movement control
4. Kick pad: Power transfert & sensation

SANISOLE 3D

(box of 10) CSESISAN3D13
(box of 10) 360042

An insole designed to provide good foot support when practicing winter sports. It has an antibacterial top layer.

SIZES
18-19-20-21-22-23-24-25
26-27-28-29-30-31-32

FEATURES

1. Antibacterial MerryMesh top layer
2. EVA shore A 40: Comfort & lightness

WINTER 3D RENTAL

CSESIREN16
309501000

A 3D insole that provides enhanced comfort and hygiene (sanitized treatment). This insole is available in 15 sizes and can be integrated into all the rental boots, or bought by the customer in the shop.

SIZES
18, 19, 20, 21, 22, 23, 24, 25,
26, 27, 28, 29, 30, 31, 32

FEATURES

1. Highly resistant merry mesh with an antibacterial coating for enhanced hygiene
2. 3mm EVA foam: Comfort
3. 3D EVA shell: Optimum protection and support on the slopes for enhanced comfort, enjoyment and reduced fatigue

INSOLES READY TO FIT

3Feet®

The eco-designed anatomical ski boot insole tailored to your foot type. Sidas has developed the 3 Feet concept, which tailors the way the insole is constructed to the 3 different foot-arch types. The EVA shell provides stability and foot support. The thin woven polyester mesh top layer, paired with our Evamic Insulated foam, provides thermal insulation, protecting your feet from the cold. This insole has also been shaped to fit easily inside your ski boot. It features an "eco-conscious" design, using materials selected to reduce its carbon footprint while maintaining the comfort, warmth and support you have come to expect from Sidas. This insole's carbon footprint is 1,75 kg of CO₂. In terms of eco-consciousness, we're doing better, but this is still around 1.75 kg of CO₂. To help offset this, we are contributing to the regeneration of forest and other ecosystems by donating one euro for every insole sold to the Sidas World Foundation.

FOUNDATION
**SIDAS
WORLD**

CONSCIENTIOUSLY

We conscientiously develop products around our customers' feet so that they can focus on their activities, whatever they may be - from supporting their little one's first day of skiing to the World Cup race.

We consciously try to limit our impact on the planet by carefully choosing the materials we use for our products; favouring low impact materials such as plant-based or recycled materials.

We provide the following information to support you in making your choices conscientiously:

- Our Ecotech label displays the percentage of recycled materials used in our products
- We measure the carbon weight of our products
- We have conscientiously reduced the carbon weight of our products. It is better but there still remains some amount of CO². To counteract this we contribute to the regeneration of ecosystems, particularly forests, by donating one euro per pair of insoles sold to the Sidas World Foundation.

2. Podiaflex® reinforcement: Foot support & stability
3. Podiafix®: Precision

CUSTOM XC CLASSIC

CSECUXCCLAS17
311932000

The Custom XC Classic insole is designed to provide classic Nordic skiers an unparalleled experience in terms of comfort, control and power transfer. The AMF top layer makes it easy to put on; the new Jogtene®Light foam provides boost during all phases of movement and the EVA base can withstand all bending stresses generated when skiing.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. AMF Top cover: Easy step in & Moisture management
2. Jogtene® Light foam: Propulsion & dynamism
3. PE high density base: Maximal resistance to bending
4. Transflux® carbon & Transflux®: Support, stability and support transfer

CUSTOM XC SKATING

CSECUXCSKAT17
311933000

The Custom XC Skating insole is designed to provide skating Nordic skiers an unparalleled experience in terms of comfort, control and power transfer. The AMF top layer makes it easy to put on; the new Jogtene®Light foam provides a boost during all phases of movement and the Podiaflex® base controls twisting, providing an optimal power transfer.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. AMF Top cover: Easy step in & Moisture management
2. Jogtene® Light foam: dynamic rebound
3. Podiaflex®: Twisting control & optimal power transfer
4. Transflux® carbon & Transflux®: Support, stability and support transfer

INSOLES PERSONALIZED

CUSTOM COMFORT MERINO

CSECUCOMFME18
314134000

The Custom Comfort Merino insole is designed specifically for skier comfort, particularly forefoot comfort, using very soft materials. This fully thermoformable insole perfectly matches the shape of the skier's foot, providing heel stability and underfoot load distribution, ensuring precise control of the skis. Its ideal hybrid covering combines 40% synthetic fibres, guaranteeing strength and durability, with 60% merino wool, which naturally minimises odours and ensures optimal temperature regulation.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. Hybrid merino top cover: Thermoregulation & Absorbs odours
2. Podialène foam 2 mm: Cushioning across the entire insole
3. Expertene padding: Optimal comfort
4. Podiafix® reinforcement: Foot stability & control
5. Transflux® reinforcement: Back foot stability
6. Podiaflex: Comfort & softness

WINTER CUSTOM PRO HEAT READY

CSECUWIPROHR19
31658700

100% customizable insoles designed for sports of winter (ski, snowboard...) for an optimal comfort. Stability, precision, performance and prevention of fatigue. Option of heating the sole thanks to Heat Ready technology!

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. AMF top cover: Soft feeling and easy fitting
2. Transflux® reinforcements: Foot support & stability
3. Podiafix®: Precision
4. Podialene foam: Cushioned sole

HEAT READY PACK 10

T44-0900-003

Pack of 10 pairs of heating elements (powered by Therm-ic) and 10 pairs of external coatings.

Note: the Therm-ic warming elements are only compatible with Therm-ic C-Packs batteries.

HEAT READY PROCESS

INSOLES PERSONALIZED

Custom

CUSTOM RACE 1

CSECURACE22_1

The Custom Race R1 is a 100% customisable alpine ski insole, recommended for speed disciplines. The podiafiber midfoot reinforcement provides stability and support, whilst the podiaflex base provides the flexibility needed to keep the ski flat.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. AMF top cover 0,8 mm : Soft and easy step in
2. Podiamic Foam 1mm : Comfort across the entire insole
3. Podiaflex®: Twisting control & optimal power transfer
4. Reinforcement Podiafiber : Maximum stability and and foot control

CUSTOM RACE 2

CSECURACE22_2

The Custom Race R2 is a 100% customisable alpine ski insole, recommended for technical disciplines. The podiafiber midfoot reinforcement provides stability and support, whilst the podiafix base provides rigidity for fast energy transfer.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. AMF top cover : Soft and easy step in
2. Podiafix: Precision
3. Podiafix: Maximum stability and heel support
4. Reinforcement Podiafiber: Maximum stability and foot control

CUSTOM RACE 3

CSECURACE22_3

The Custom Race R3 is a 100% customisable alpine ski insole, recommended for technical disciplines. The podiafiber midfoot reinforcement provides stability and support, and the podiafiber base provides extreme stiffness for ultra-fast energy transfer.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. AMF top cover : Soft and easy step in
2. Podiamic Foam 1mm: Comfort across the entire insole
3. Podiafiber: Maximum stiffness and reactivity
4. Reinforcement Podiafiber: Maximum stability and foot control
5. Podiafiber over-reinforcement: Maximum stability and arch support

THE PREMIUM FIT STATION IS THE MUST-HAVE CUSTOM MOULDING STATION! ITS ERGONOMIC, ELEGANT AND SIMPLE DESIGN LETS YOU PROMOTE YOUR BOOT-FITTING ACTIVITY IN-STORE, PARTICULARLY THE CUSTOM TECHNOLOGY.

The design ensures both comfort for the boot-fitter and simple moulding. The station is easy to access for both the customer and the technician. It consists of a comfortable adjustable seat and support bars to ensure stability for the customer during the moulding process. A luminous band emphasises the outline of the station and promotes your boot-fitting space.

In technical terms, the sophisticated station allows you to analyse feet using the fully-integrated podoscope, to heat using the Moduvac and to make imprints using the directly integrated silicone bags. 5-year guarantee on the equipment. Lifetime guarantee on metal structure.

110V 309537101

220V CMAVAHDBLK-2
220V 309536101

The best just got better. The HDVAC was already the best Custom system on the market, but the HDVAC2 is the most precise system ever made. The silicon bags can be stretched up to 800% to adapt to any foot shape, the bags are separated for better hip adaptation, and all the controls are on the front making it easier for the boot-fitter to operate. For retailers who want to offer a complete professional service, this tailor-made product will enhance your custom business line. If you want to bring the best service to your customer, the HDVAC2 is for you.

The HDVAC 2 is a system for moulding comfort insoles, but cannot replace plantar orthoses fitted by professional foot specialists.

LASER ALIGNEMENT SYSTEM

CMAVALASER12
36010201

Top-quality laser used to check leg alignment. Attaches easily to the Fit Station.

MODUVAC

110V CMAMODU09-1
110V 10757601

220V CMAMODU09-2
220V 107 57501

The new Sidas system to accompany the HDVac2 system for moulding Custom footbeds. Compact, fast and simple, the Moduvac heats and presses the footbeds using a vacuum system in order to fuse the materials together, and prepare the insoles for moulding. The Moduvac is compatible with all HDVac systems.

DUAL LASER ALIGNEMENT SYSTEM FOR STATION PREMIUM

CMAVALASPREMIUM
312039101

The dual laser is designed to fit ergonomically on the Premium Fitstation. It enables the technician to check the shin alignment of the customers and speak to them effectively about the benefits of an insole. The dual laser can be adjusted horizontally. It consists of two independent lasers. Works with 2 batteries (supplied).

31643100

The finest thermoformable liner.
100% thermoformable, this liner is designed for alpine or touring ski boots with a low fitting volume. Designed with the same technology as the CRT, it is distinguished by its finesse and lightness.
The removable flap is thermoformable and can also be replaced by an injectable Sidas flap or a Heat Ready heated flap.

SIZES

D-K

FEATURES

1. Merry mesh lining: Comfort, lightness, low thickness
2. Collar joint: High flexibility, follows the rolling out of the foot as you walk
3. 3 lateral EVA thicknesses: Precision and comfort + heel support
4. Thin removable flap: For maximum precision

Issued with Ready-to-fit tongue SLIM

CENTRAL REMOVABLE TONGUE (CRT)

CCHCFTHERCRT18
314194000

100% thermoformable, this liner is designed for alpine skiing and cross-country skiing. The result of 2 years of development with the best bootfitters, its internal structure, with variable thicknesses, guarantees comfort and precision after moulding.
The removable flap is thermoformable and can also be replaced by an injectable Sidas flap or a Heat ready heated flap

SIZES

D-K

FEATURES

1. Micro-fur upper lining: Maximum comfort
2. Merrymesh lower lining: For greater precision
3. Upper cuff opening: Flexibility
4. 3 EVA side width: Precision and comfort & heel support
5. Removable tongue: For optimal precision

Issued with PU foam tongue

TONGUES

TONGUE HEAT READY POWERED BY THERM-IC

CCHDCLARTFHR19
316588000

Adjustable heated flap made using Therm-ic technology. Designed for skiers who suffer from cold feet who want to combine comfort and technology with a 100% customised heated liner. Invisible heating element integrated into the front of the liner ensuring optimal warmth for the foot. Works with C-pack Therm-ic batteries (sold separately)

READY-TO-FIT TONGUE SLIM

CCHDCLARTFSL19
316589000

The fine and adjustable liner is designed for alpine or touring ski boots with a low fitting volume. Its design offers greater precision and adapts perfectly to the foot.

READY-TO-FIT TONGUE V2

CCHDCLARTFV2
372492

The fine and adjustable liner is designed for alpine or touring ski boots with a low fitting volume. Its design offers greater precision and adapts perfectly to the foot.

PU FOAM TONGUE

CCHACFTONG17
312025000

The adaptable tongue is very curved to fit perfectly to the foot and allow maximum power of transmission. Its unique design provides flexion perfect progressive.

SOFT TONGUE

CCHDCLARTFSF23

100% thermoformable tongue that can be adjusted as close as possible to the shin. This tongue is designed for ski touring as well as traditional alpine ski boots. This tongue is precise, compact and help with the fit of the ski touring boot.

SHIN PROTECTORS

ASKINSHINPROTXL16
109555101

Larger shin protectors for maximum comfort. The shin protectors are supplied in pairs and are specially shaped to fit the shin. They effectively relieve pain caused by pressure on the shins from ski boots. Placed underneath the sock, these protectors stay firmly in place throughout any sporting activity.

- Varying-thickness gel: 2 mm at the edges and 4 mm in the middle, for improved protection.
- Re-usable.
- Hand-washable with household detergent for a better hold.
- Supplied in 20s in a paperboard box that also serves as the in-store display unit.

x 2

ANKLE PROTECTORS

ASKINANKLEPROT16
109556101

Silitene™ protectors specially designed to fit round the ankle. They effectively relieve pain caused by the boots pressing against and rubbing the inside and outside of the ankle. Placed underneath the sock, these protectors stay firmly in place throughout any sporting activity.

- Varying-thickness gel: 2 mm at the edges and 4 mm in the middle, for improved protection.
- Re-usable.
- Hand-washable with household detergent for a better hold.

This Kit Deform Twin is the basic kit for stores wishing to start a bootfitting operation and to offer a quick and efficient service to their customers.

TOOLS		CHARACTERISTICS	ADVANTAGES	BENEFITS
CROCO TWIN	1	<ul style="list-style-type: none"> ► 10mm steel structure ► 45° curvature ► Deformation measuring system ► Removable tool support heads 	<p>Shell reshaping tool that allows the bootfitter to access all parts of the shoes and also to measure the size of the reshaping carried out.</p> <p>Its symmetrical construction allows a single tool to be used for the best results for both right and left shoes.</p>	<ul style="list-style-type: none"> ► The precision of the alignment of the tool under Stress is guaranteed ► Allows for precise reshaping of the forward parts of the foot (M1 and M5) ► The reshaping work is carried out with precision ► Makes it possible to work on the right and left areas with a single tool ► Easy and effortless reshaping
VARIABLE ARCH	2	<ul style="list-style-type: none"> ► Double shaft ► Plates on ball join ► 190 mm serif 	<ul style="list-style-type: none"> ► Possibility to have 2 push axis ► Provides support on differently shaped surfaces ► Big space between the push axis and the support surface 	<ul style="list-style-type: none"> ► Allows very extensive forefoot deformations ► Provides a stable and homogeneous support ► Avoids damaging the shell during deformation
STRETCHING RING	3	<ul style="list-style-type: none"> ► Diam: 137 mm 	<ul style="list-style-type: none"> ► Large support far from push axis 	<ul style="list-style-type: none"> ► Doesn't mark the shell
METAL CONNECTORS	4	<ul style="list-style-type: none"> ► Aluminium structure ► Mounted with screw 	<ul style="list-style-type: none"> ► Maintains the heat ► Easy to mount and dismount 	<ul style="list-style-type: none"> ► Give an inside heating of the deformation zone, creating a more precise and quick deformation ► Time gain when changing the tips, and keep the rotation of the tips

DEFORMAR

KIT DEFORM 75 +

COUCHKIT75P
37251301

This kit is designed to complement the Deform 75 kit. It is used for localised shaping of wider boot shells. Used together with the Deform 75 kit, it provides an enhanced solution to customers' localised foot pain problems.

KIT DEFORM YETI

COUCHKIT75P
37251401

USED AND APPROVED BY BOOT FITTERS FOR MORE THAN 10 YEARS, THE YETI AND YETI+ KITS HAVE NOW BEEN COMBINED TO CREATE THE DEFORM YETI KIT.

It is suitable for all generalised boot shaping requirements. Designed to complement the Deform 75 and Deform 75+ kits, it is suitable for all boot shell-shaping requirements.

DEFORMAR

SHEEVA FULL EQUIPPED

110V COUCHSHEEVAKIT1-L
110V 321479101

220V COUCHSHEEVAKIT2-L
220V 321478101

AN INNOVATIVE TOOL FOR BOTH BEGINNER AND EXPERIENCED BOOTFITTERS.

Sheeva is complete and easy to use, helping you save time and simplifying all shell molding operations, even the most complex.

The main axis can take several types of molding such as instep, toes, right boot and left boot, and it can rotate to make it easier to access all the tools.

Equipped with a central electronic control panel, the bootfitter can heat or cool the boot with a variety of cycles to control the time and the temperature for each system (up to four).

► Included the 4 types of déformations, and 4 cooling systems.

Allows you to make changes to the forefoot area where the toes conflict with the ski boot. Must be used with : Toebox punch kit + Heating elements - LONG		
COLD		
COOLING SYTEM	# 110V COUCHSHEEVA-VENTIL # 110V 322150101	
Easily installed on any arm and cools the ski boot from the inside.		

ANALYSE & OPEN

BOOT SPREADER 360

without accessories COUCHKITSPRE360
without accessories 319786101

Kit COUCHKITSPRE360
Kit 319790101

Makes the analysis easier. It is the essential in-store tool to check that the shoe is suitable for the foot. Its ability to open wide and rotate through 360° make working with it safer and simpler.

- Aluminium profile structure
- Enhanced steel handles
- Universal shell attachment system
- Dimensions: 54 x 43 CM

OPTION

OPTION LED LIGHT

COUCHLEDLIGHT
319788101

Magnetic lamp that can be fixed to the Bootspreader 360, allowing the inside of the shell to be lit for precise and safe work.

OPTION BALL JOINT HOLDER 360

COUCHBALLHOL360
319787101

Fixable ball joint on the work bench allowing the shell to be oriented in any direction.

OPTION WORKBENCH ADAPTOR

COUCHWOBENADAP
319789101

Fixing bracket for the worktop allowing the bootspreader to be offset on the worktable for better ergonomics for the bootfitter.

ON SOLE & TONGUE SOLUTIONS

VOLUME REDUCER

#3MM CSEDSRV3
#3MM 995942

#5MM CSEDSRV5
#5MM 866007

This volume-reducer can be placed under a Sidas insole to reduce the fitting room and provide better foot support inside the boot, for superior precision and comfort.

Available in 3mm thickness (high-density) and 5mm thickness (medium-density). Can be trimmed to ensure a better fit inside the boot.

► Sold in boxes of 20 pairs.

3 mm

5 mm

#4MM CSEACHEELLFT16_HD_04
#4MM 309545201

#5MM CSEACHEELLFT16_HD_06
#5MM 309545202

Heel insert that goes inside the boot to reduce the volume. Sold in packs of 20 pairs.

► Heel lift hard 4mm
► Heel lift hard 6mm

HEEL LIFT SOFT

#6MM CSEACHEELLFT16_SF_06
#6MM 309545102

Heel insert that goes inside the boot to reduce the volume. Sold in packs of 20 pairs.

► Heel lift SOFT 6mm

TONGUE SPOILER

CCHACTONGSPO16
309567101

The tongue spoiler is used to regulate the volume between the shell interior and tongue.

The spoiler is

- Pre-shaped
- Adhesive-coated
- grindable
- Thermoformable
- Thickness 5 to 10 mm
- Pack of 1 pair
- Available in 1 size

TONGUE SPOILER COVER

5 BLADES FOR SCALPEL # P99SCALPLAME
5 BLADES FOR SCALPEL # 32834101

A WAY OF MODIFYING BOOT LINERS TO SOLVE SKIERS' FOOT PROBLEMS!

This system involves cutting sections out of the boot liner in the places that are causing the skier pain and replacing these sections with Innerboot Comfort Padding, making the liner more comfortable and quickly relieving pain.

Pre-cut elements in several shapes with a protective top layer included: a fast solution for the bootfitter.

Materials used: padding made from Expertène 220 (PU foam) and Ionmesh top layer: advanced materials for an effective, professional solution.

Grey top layer with Sidas logos.

INNER FRAME FOR BETTER
GRIP ON YOUR SHOES

FLEXIBLE AND
RESISTANT RUBBER

PROCESS

01 SIZE ADJUSTMENT

- Check the length of your ski boot in mm.
- Adjust the ski boot traction device to the corresponding size (round down). The tip of the arrow indicates the size selected.
- Screw in with a Phillips screwdriver.

02 FITTING THE DEVICE ON THE SHOE

- Strap on the ski boot traction, starting from the front of the boot, then pull back to adjust it on the heel.
- This product should be stored in a dry place, away from heat and UV sources. It is recommended to check the product every year.

STRAP

POWER STRAP

Power Strap P1 CCHACSIRACSTRP1
Power Strap P2 CCHACSIRACSTRP2

Power Strap P3 CCHACSIRACSTRP3
Power Strap P4 CCHACSIRACSTRP4

The flex of your ski boots is essential for the control of your skis, and therefore your performance. The use of an elastic strap improves this flexion while improving shin comfort with the tongue. Our power straps are constructed with 4 different elastic levels, from the softest (P1) to the stiffest (P4) to allow you to adjust the control of your skis to your liking. The straps are equipped with a metal buckle for precise and powerful tightening as well as side protection reinforcement to protect the strap against edge hits during use.

STIFFNESS LEVEL / Niveaux de rigidité

FREERIDE POWER STRAP

Freeride Power Strap P2 CCHACSIFREPSTRP2
Freeride Power Strap P3 CCHACSIFREPSTRP3

The flex in your ski boots is essential to controlling your skis and therefore your performance. Using an elastic strap improves the flex while the boot tongue improves shin comfort. Our Freeride Power straps are constructed with 2 elasticity levels: supple (P2) and stiff (P3), enabling you to set the level of ski control you want. These straps feature a metal buckle to fine-tune tightening and for strength, plus reinforcing on the sides to protect the strap from your ski edges when you're out on the mountain.

STIFFNESS LEVEL / Niveaux de rigidité

P1	P2	P3	P4

POWER STRAP

CCHACBOOSIDM15
309520101

The Sidas Booster™ Strap is an essential accessory for improving ski boot performance. When used correctly, it ensures excellent control of the skis, improves comfort and helps prevent shin pain. It eliminates empty space between the shin and the ski boot tongue.

The Sidas Booster™ Straps are supplied with 4 screws and 4 grip inserts.

RACE BAGS

RACE BOOTS BAG - 90L

CMKSAC_02
329900101

A RACE BOOT BAGS DESIGNED TO PACK ALL THE GEAR OF THE SKI RACER WITH AN INTEGRATED FOLDABLE SEAT.

A 90-litre storage bag for skiing accessories (boots, helmet, gloves, goggles), ideal for ski racers and young ski club members. The bag features an integrated folding seat for when you need to sit down or change without getting wet feet. Made of ripstop polyester and 900D polyester, it is extremely tear-resistant and features waterproof panels.

COMPOSITION

- Integrated foldable seat
- Polyester ripstop
- Polyester 900D

SIZES

40 x 42.5 X 24 cm

RACE BOOTS BAG - 60 L

CMKSAC_01
329899101

A 60-litre storage bag for skiing accessories (boots, helmet, gloves, goggles) in a very compact volume – ideal for ski racers and young ski club members. Made of ripstop polyester and 900D polyester, it is extremely tear-resistant and features waterproof panels.

COMPOSITION

- Polyester ripstop
- Polyester 900D

SIZES

40 x 42.5 X 24 cm

MEASURING THE FOOT

SIZES

A size is a series of measurements, expressed in points, that characterise a foot, last or shoe.

There are different size systems, each with its own history and logic: The Paris Point (EUR), the American Point (US) and the English Point (UK).

The Mondopoint (MP) system, resulting from work carried out by more than 18 countries and governed by international standard ISO 9407, has been created to harmonise the scales.

OPTION 1: FOOT SIZER

Measurement of the length and width of the foot
