FIND OUT MORE
ABOUT THE
SIDAS WORLD

A PARTNER FOR EVERYONE WHO WANTS TO GIVE TO THEIR FEET THE COMFORT AND PROTECTION THEY NEED FOR EACH NEW SPORT AND EACH NEW DAY.

The success of Sidas' various projects is achieved by combining our passion for sport with the expertise of athletes, orthopaedic centres and sports experts.

Sidas offers a wide range of products: insoles, foot protections, shoes, ski liners, socks, thermal socks and accessories.

SIDAS designs 360° foot care products, including comfort solutions adapted for all types of sport and all types of wear.

Podiatech offers a full range of equipment and consumables for podiatry and foot care, in order to meet the needs of foot care professionals and their patients.

Therm-ic develops thermal products to help users stay warm when participating in winter sports and activities, allowing them to get the most out of their pursuits.

Corpus.e is one of the most innovative suppliers of technologies in the field of digital sales. Its objective is to connect feet with shoes, based on their volumetric data. Its Shoo IQ platform is unique in that it enables the matching of feet with shoes, regardless of which measuring tool is used.

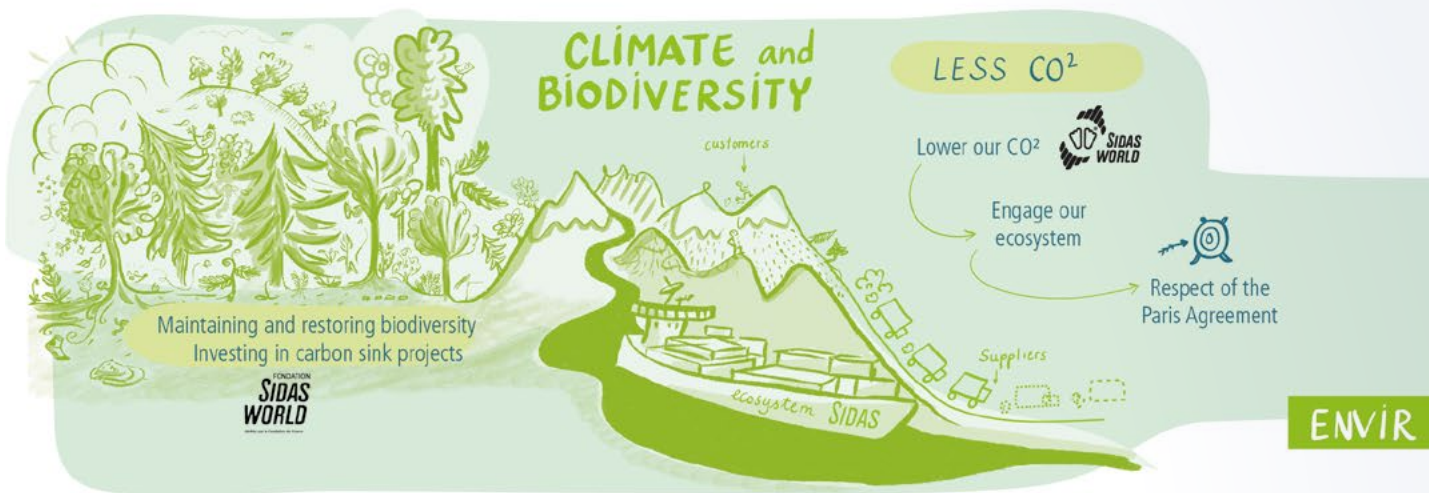

The Academy is born from the last 40 years of experience of Sidas world. Sidas and Podiatech have always trained their clients to be able to deliver the best custom products. The Academy wants to go further and share with you all our experience. Today the academy wants to be more... and share its experience, thanks to its network gathering the best world experts in their fields.

Serving wellness and natural health since 1977. We develop high-performance natural care products in France, respecting balance and nature. With **Qenoa** find comfort and vitality. Optimise and preserve your health in a harmonious way.

SATISFACTION

SIDAS WORLD'S ACTIONS AND LEVERS IDENTIFIED

TRANSPORT

75% of our employees have signed up to our soft mobility and car-sharing policy.

30% of our mobile teams were trained in eco-driving last year. Our goal is to achieve 100% in 2024.

FREIGHT

We have actioned 2 main levers:

- Favours sea freight over air freight
- Reducing our freighting distance: shipping directly from the production plant to the country of sale.

We monitor our progress using the carbon intensity indicator for the shipped products (carbon emissions per kg of products shipped).

Our e-commerce websites now feature a greenhouse gas emissions simulation for each delivery method, informing consumers of the difference between home delivery and delivery to a pick-up point.

FIXED ASSETS

70% of the electricity consumed by our Base Camp is generated by photovoltaic panels.

We have renovated the Factory to upgrade its insulation. We are planning other renovation projects on our older buildings. Our plans for refitting work are focused on energy efficiency, energy self-sufficiency and sparing use of energy in our buildings.

Half of our computers are second-hand. Buying a reconditioned computer emits 17% less CO₂ than buying a new one.

100 tonnes of CO₂ equivalent emissions were prevented in 2023 through Manutan, which provides a collection and recycling service for our computer hardware.

∞ DESIGN & MANUFACTURE OF OUR PRODUCTS

OUR PRODUCTS ARE DESIGNED TO BE LONG-LASING AND TIMELESS.

Our clothing and insole collections are based on the needs of the body in the different seasons. We apply the same logic to our footcare and podiatry machines. We produce new machines only when they have a clear purpose or when they represent a real technological innovation.

SIDAS WORLD'S COMMITMENTS

HELPING TO REDUCE GLOBAL CO₂ EMISSIONS

Absolute reduction in our CO₂ emissions of **13% in 2025 and 26% in 2030** compared to our reference year (2019).
Reduction in our **carbon intensity** of **6% per year** for 10 years.

Creating a responsible purchasing policy to ensure that our values are aligned with the ethical, social and environmental commitments of our suppliers. We prioritise collaboration with the 20 biggest Sidas World suppliers, representing 70% of our purchasing volume.

REGENERATING NATURE

The Sidas World Foundation has committed to allocating an annual contribution of €100,000 per year to support projects protecting endangered ecosystems and improving natural carbon capture.

In 2022 Sidas World became a majority shareholder of Team for the Planet, participating in decision making at the annual general meetings. The objective of Team for the Planet is to create 100 businesses designed specifically to combat global warming with innovative scientific solutions.

Abritée par la Fondation de France

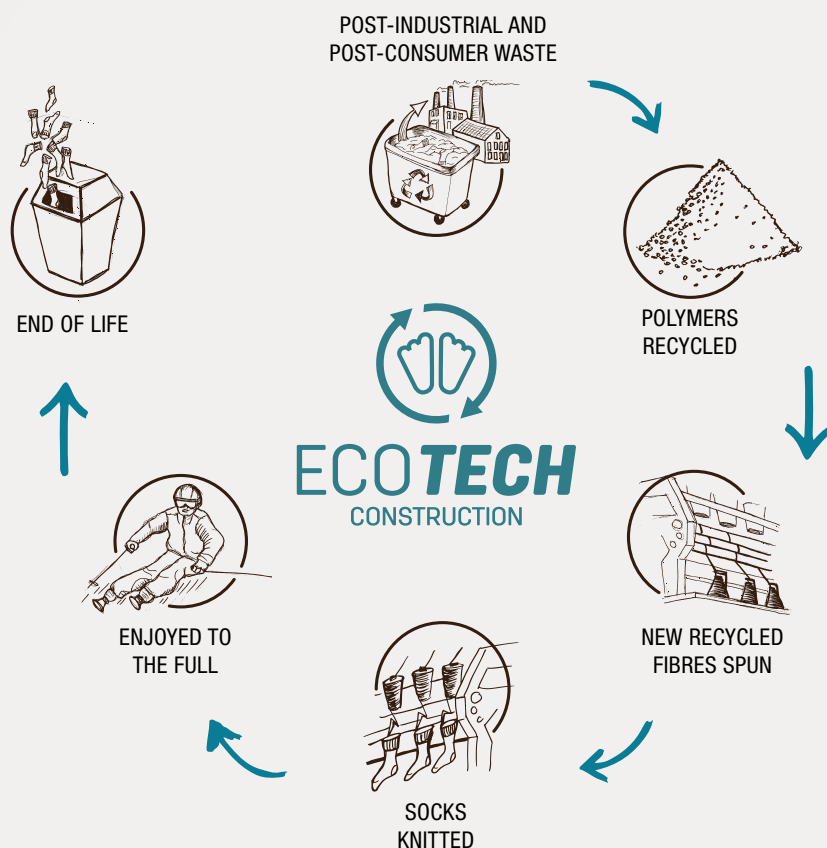

“Beyond the performance and satisfaction of all, a company must undertake all its responsibilities on an environmental and human level. The Sidas World Foundation will take action on the environment, by supporting concrete projects on climate and biodiversity.”

Let's take action together !

The word of our directors Jean-Pierre Delangle and François Duvillard.

WHAT SIDAS IS COMMITTED TO DOING

THE ECOTECH LABEL DEVELOPED BY SIDAS
MEASURES THE PROPORTION OF RECYCLED
MATERIAL IN THE PRODUCT DESIGN.

> Sidas winter socks all have the Ecotech label, which means that they contain recycled materials.

> 100% of Sidas socks are produced in Europe.

SIDAS HAS CHOSEN TO REDEVELOP ITS BEST-SELLING INSOLES TO SIGNIFICANTLY REDUCE THEIR ENVIRONMENTAL IMPACT.

3 FEET ECO® WINTER

20% reduction in the CO₂ impact of a pair of insoles compared to the 3 Feet Winter®.
> 18% recycled materials used

3 FEET ECO® WARM

50% reduction in the CO₂ impact of a pair of insoles compared to the 3 Feet Mérino®.
> 30% recycled materials used

SIDAS HAD BEEN FOUNDED IN 1975, IN THE PART OF THE FRENCH ALPS. THE 3 FOUNDERS LOIC DAVID, GABRIEL PELLICOT AND JACQUES MARTIN, HAVE THE IDEA OF THE FIRST CUSTOM INSOLES BY WALKING IN THE SAND OF AN HAWAIIAN BEACH. SINCE THERE SIDAS NEVER STOP INNOVATING AND DEVELOPING IT EXPERTISE AND KNOW HOW FROM THE SKI TO THE RUNNING AND FROM CUSTOMIZED INSOLES TO SOCKS, FROM DIGITAL ANALYSING TOOLS TO SOLUTIONS FOR THE SHOES.

As a feet expert and sport expert, we are able to provide the best solutions for any kind of consumers and sports activities, from socks to insoles and boot accessories. Our development are based on our 45 years of fitting expertise, digital database of more than 500 000 feet scanned and a network of foot and sport experts around the world. Our mission is to provide solutions for the consumers in order to have them focus on their activity.

As a brand, we want to be committed to the consumers, the distribution and the sports. As a brand we want to act responsibly to our ecosystem.

Focus on your activity, we take care of your foot.

THE FIT PROTOCOL IS A UNIQUE PROTOCOL MADE TO SERVE THE END-CONSUMERS; ANSWERING THE NEEDS OF RETAILERS AND INTEGRATING THE BRANDS IN THE PROCESS.

FOR 40 YEARS, OUR KNOW-HOW, OUR EXPERTISE FOR TRAINING AND OUR RETAILERS FOLLOW UP; HELP US TO CREATE A PROTOCOL THAT GUARANTEES THE BEST EXPERIENCE FOR CONSUMERS, BRANDS AND RETAILERS.

A win win win process between consumers, retailers and brands.

- CONSUMERS: feel good because they have great fitted shoes.
- RETAILERS: follow a specific proven protocol to improve their running business through KPI (Key Performance Indicators).
- BRANDS: can count on the retailer to sell their products correctly, responding to consumer needs.

TO BE PART OF THE FIT PROTOCOL PROGRAM:

- Mandatory products
- Mandatory specific trainings
- Special marketing & communication tools
- Special business conditions

MEASURING AND ANALYSIS

THE FOOT MEASURING TOOL TO THE DIGITAL PLATFORM shoo^{IQ}

NEW

FEET REVELATOR IQ

#110V ABFEETREVEIQ24
#110V 128874101

The new Feet Revelator IQ is a mechanical foot-measuring tool that measures the length, width and arch type of the right and left foot separately. It comes with a QR code for easy access to the new Shoo Lite app on the customer's phone. The app provides more detailed information about the measurements.

CONNECTED

A QR code on the device can connect the smartphone of the customer to the Shoo IQ lite platform to store the measure of the feet and provide a more accurate information to the customer

INDEPENDANT MEASUREMENT RIGHT AND LEFT

The length and the width are measured independantly thanks to the new construction of the Feet revelator for a more precise information and so a better recommendation.

MEASUREMENT

Mechanical structure that can easily measures the length and the width of the feet of the consumer. A dedicated film construction can provide the footprint of the arches to determine its type.

#110V 322152101

#220V CMAFEETBOXEVO
#220V 321760101

With a new, ultra-fine pressure platform, the new Feetbox EVO is more reliable in its analysis process. Equipped with a new professional HD camera, taking measurements is more precise, allowing you to view the pressure of the customer's feet directly.

The platform is also able to identify the customer's foot arch type to help the salesperson recommend the best product for their customer. The 24" touchscreen is easy to read and intuitive to use.

Its light, compact structure (less than 40 kg) allows it to be installed in any kind of store. Assembly is quick (15 minutes), and the platform's covering is durable and easy to clean.

OUR AIM: TO GIVE YOUR CLIENTS AN IN-STORE EXPERIENCE, IN ORDER TO ENHANCE YOUR BUSINESS AND SERVICES.

The plate is equipped with a 360° camera that scans your feet and legs up to the knees, in order to obtain a 3D model of them. You can see all the measurements of your feet (length, width, thickness), ankles and calves on the screen. The system makes it possible to simulate the fitting of a customised insole and shoe whilst taking into account the thickness of the sock.

After connecting to the database of footwear sold in your shop and a chat with your customer; Feetbox® 3D makes it possible to simulate fitting shoes that are suitable for your customer's feet, in accordance with their constraints, needs and budget by virtually fitting the shoe on the feet, it also makes it possible to see the different areas where the feet are deformed that need to be considered. An unrivalled experience for the client and it saves you time. Using Feetbox® 3D gives the consumer a unique experience.

A SIDAS X SALOMON TRAIL RUNNING TEAM COLLABORATION

1/ SIDAS GRIP TECHNOLOGY

A game changing feature that holds your feet in place for precision, stability and support you can feel. Achieved through a combination of high-quality foams, an ultra thin sandwich construction, and slightly grippy material on the underside of the insole to stabilize you in for the ups as well as the downs.

2/ UNDERFOOT COMFORT

A flexible pre-shaped sandwich construction with friction reducing materials used on the outer surface ensure a chafe-free and comfortable run.

3/LIGHTWEIGHT DURABILITY

Conceived using an ambitious and well-balanced combination of high-quality foams that are both ultra thin and lightweight as well as extremely durable.

DEMOKIT GOLF 3D

CSE3DDKGOL12
32693801

During physical activity, your feet are constantly stressed and suffer shocks equivalent to 3.5 times the weight of your body, or even up to 7 times in the case of a jump. Thanks to Podiane®I+ developed by SIDAS, MAX PROTECT insoles absorb 90% of the impact. They protect your joints from repeated shocks and improve long-term comfort.

Podiane®I+ is a cushioning material developed by SIDAS, capable of absorbing shocks of any intensity. During impact the Podiane I+ compresses and dissipates 90% of the shockwave, to protect your joints.

MAX PROTECT

F-ESSENTIALS™

MAX PROTECT MOVE SUPPORT

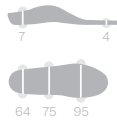

CSEESMPRMOSP20
321218000

Improve comfort and stability during your physical activities with MAX PROTECT MOVE SUPPORT multi-sport insoles. Designed to absorb 90% of the energy from an impact thanks to Podiane I+ technology, they protect your joints from repeated shocks and give you dynamic support thanks to their TPU FLEX arch supports.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. Podiane I+: High shock absorption
2. TPU FLEX shell: Supports and stabilises the foot
3. Mesh covering: Breathability and comfort
4. Gel pad: Cushioning and heel comfort

MAX PROTECT ACTIV' SLIM

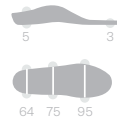

CSEESMPRACSL20
321221000

Increased comfort and performance for high-intensity sports thanks to MAX PROTECT ACTIV' SLIM insoles. Designed to cushion shocks, these insoles use Podiane I+ technology which absorbs 90% of the energy from an impact and protects your joints. Their propulsive insert at the front ensures energetic launching whilst their TPU Flex arch support improves your stability and reduces the risk of twisting. The mesh covering and the gel insert at the heel ensure perfect moisture management and immediate comfort. In the slim version, these MAX PROTECT insoles are ideal for low-volume footwear.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. Podiane I+: High shock absorption
2. Dynamic insert: Improves propulsion
3. TPU FLEX shell: Supports and stabilises the foot
4. Mesh covering: Breathability and comfort
5. Gel pad: Cushioning and heel comfort

MAX PROTECT ACTIV'

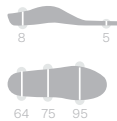

CSEESMPRACTI20
321220000

Comfort and maximum cushioning for high-intensity sports thanks to MAX PROTECT ACTIV' insoles. Designed to offer cushioning from the most extreme shocks, these insoles use Podiane I+ technology which absorbs 90% of an impact's energy and actively protects your joints. Their propulsive insert at the front ensures energetic launching while their TPU Flex arch support holds the foot and reduces the risk of twisting. The mesh covering and the gel insert at the heel ensure perfect moisture management and immediate comfort.

SIZES

INSOLES

READY TO FIT

DAILY LIFE

THE DAILY LIFE RANGE BRINGS TOGETHER DIFFERENT INSOLE MODELS AND TECHNOLOGIES (FROM READY-TO-WEAR TO CUSTOM-FIT) DESIGNED FOR EVERYDAY USE. IT GUARANTEES MAXIMUM COMFORT AND CUSHIONING FOR DIFFERENT SHOE SIZE VOLUMES (SMALL TO LARGE).

F-ESSENTIALS™

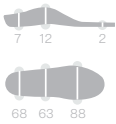

CUSHIONING GEL SLIM

CSEESCUSHSL15
378626

Dynamic gel construction for maximum cushioning of the heel. Cushioning Gel Slim insoles absorb shocks thanks to the dynamic cushioning gel concept developed by Sidas: a network of gel microbubbles placed in the impact zone is gradually deformed upon impact, thus providing an exceptional dynamic cushion. Anti-bacterial and washable insoles. Insoles designed for slim-fitting footwear (thickness 2 mm).

SIZES
XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. Toplayer: Cushioning & antibacterial
2. Micro-perforations: Breathable
3. Gel: Cushioning & comfort
4. Dynamic Gel: Active cushioning

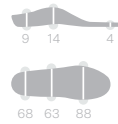

CUSHIONING GEL

CSEESCUSHION
368302

Dynamic gel cushioning for maximum cushioning of the heel. Cushioning Gel insoles absorb shocks thanks to the dynamic cushioning gel concept developed by Sidas: a network of gel microbubbles placed in the impact zone is gradually deformed upon impact, thus providing an exceptional dynamic cushion. Anti-bacterial and washable insoles.

SIZES
XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. Toplayer: Cushioning & antibacterial
2. Micro-perforations: Breathable
3. Gel: Cushioning & comfort
4. Dynamic Gel: Active cushioning

CUSHIONING GEL MEMORY

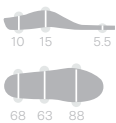

CSEESCUSHMEMO
301525000

Cushioning Gel Memory insoles absorb shocks effectively because they feature the dynamic cushioning gel concept developed by Sidas. A network of gel microbubbles situated in the shock zone progressively deforms upon impact to create an unrivalled dynamic cushioning effect. The memory foam top layer moulds around the foot shape, distributing pressure evenly to ensure maximum comfort throughout the day.

Washable antibacterial insoles.

SIZES
XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. Toplayer: Cushioning & antibacterial
2. Micro-perforations: Breathable
3. Gel: Cushioning
4. Memory foam: Pressure point distribution & long-lasting comfort

C Custom

THE PREMIUM FIT STATION IS THE MUST-HAVE CUSTOM MOULDING STATION! ITS ERGONOMIC, ELEGANT AND SIMPLE DESIGN LETS YOU PROMOTE YOUR BOOT-FITTING ACTIVITY IN-STORE, PARTICULARLY THE CUSTOM TECHNOLOGY.

The design ensures both comfort for the boot-fitter and simple moulding. The station is easy to access for both the customer and the technician. It consists of a comfortable adjustable seat and support bars to ensure stability for the customer during the moulding process. A luminous band emphasises the outline of the station and promotes your boot-fitting space.

In technical terms, the sophisticated station allows you to analyse feet using the fully-integrated podoscope, to heat using the Moduvac and to make imprints using the directly integrated silicone bags. 5-year guarantee on the equipment. Lifetime guarantee on metal structure.

220V CMAVAHDBLK-2
220V 309536101

The best just got better. The HDVAC was already the best Custom system on the market, but the HDVAC2 is the most precise system ever made. The silicon bags can be stretched up to 800% to adapt to any foot shape, the bags are separated for better hip adaptation, and all the controls are on the front making it easier for the boot-fitter to operate. For retailers who want to offer a complete professional service, this tailor-made product will enhance your custom business line. If you want to bring the best service to your customer, the HDVAC2 is for you.

The HDVAC 2 is a system for moulding comfort insoles, but cannot replace plantar orthoses fitted by professional foot specialists.

LASER ALIGNEMENT SYSTEM

CMAVALASER12
36010201

Top-quality laser used to check leg alignment. Attaches easily to the Fit Station.

MODUVAC

110V CMAMODU09-1
110V 10757601

220V CMAMODU09-2
220V 107 57501

The new Sidas system to accompany the HDVac2 system for moulding Custom footbeds. Compact, fast and simple, the Moduvac heats and presses the footbeds using a vacuum system in order to fuse the materials together, and prepare the insoles for moulding. The Moduvac is compatible with all HDVac systems.

DUAL LASER ALIGNEMENT SYSTEM FOR STATION PREMIUM

CMAVALASPREMIUM
312039101

The dual laser is designed to fit ergonomically on the Premium Fitstation. It enables the technician to check the shin alignment of the customers and speak to them effectively about the benefits of an insole. The dual laser can be adjusted horizontally. It consists of two independent lasers. Works with 2 batteries (supplied).

C Custom

CUSTOM BIKE PRO

CSECUBIKEPRO19
317793000

Fully customisable insoles developed in partnership with the ASTANA cycling team. These insoles have been designed to offer cyclists a unique experience by improving performance through reduced susceptibility to fatigue, and increased comfort and precision. Their construction helps to stabilise the heel, keep the midfoot in place and distribute load, optimising the power transfer from foot to pedal. The forefoot technology significantly reduces vibration and protects joints from microtrauma. Antibacterial, resistant insoles suitable for narrow shoes.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. AMF topcover: Good moisture management, antibacterial & durable
2. Expertene foam: Optimum comfort, reduced vibration & extremely resistant
3. Podiaflex: Foot support & control
4. Transflux reinforcements: Support & stability for the rearfoot, encouraging correct body alignment

CUSTOM BIKE PRO ULTRA

CSECUBKPRULT20
321354000

Inspired by our collaboration with the Astana Pro team, the new Custom Bike Pro Ultra insole improves the energy transfer of your shoes, for more efficient and fluid pedalling. Its PODIA-FIBER structure, exclusively developed by SIDAS, offers 6 to 7 times more rigidity under the foot while maintaining minimum thickness and weight. With each rotation, the transfer of forces from the foot to the pedal is optimised, without compromising the comfort and precision of your shoe.

100% customisable, this very easily mouldable insole will perfectly adapt to the anatomy of every foot for optimal alignment of the lower limbs, reducing pain and the risk of muscle and joint injuries.

SIZES

XS-S-M-L-XL-XXL

DIMENSIONS

FEATURES

1. Lighten dynamic foam + AMF: Comfort and dynamism
2. PODIAFLEX Base: Rigidity, robustness and flexibility
- 3-4. 1 mm PODIAFIBER® reinforcement: Optimal rigidity

SIZES UNISEX: 35-38 / 39-41 / 42-44 / 45-47 SIZES WOMEN: 35-36 / 37-38 / 39-40 / 41-42

Lightweight, technical running socks built to improve comfort while running.

All the essential benefits expected for running have been incorporated into the design of the socks: open mesh under the foot where heat is important for good breathability, protective zones located in the heel and toes for better cushioning, oversized toe box and metatarsals for more comfort, ankle support to improve stability and limit the risk of injury, Anatomic construction of the socks with a grip strip to ensure better contact with the insoles and more comfort.

BREATHABILITY
Ventilated mesh in the arch of the foot for moisture wicking and breathability when running.

IMPROVED GRIP
A band of silicon yarn is added to the socks construction in order to improve the grip between the socks and the shoe insoles to enhance the benefits of the insoles for optimal comfort.

REINFORCED PROTECTION
These socks have two protective zones in the heel and toe area to ensure the runner's comfort on all the terrains.

SIZES UNISEX: 35-38 / 39-41 / 42-44 / 45-47 SIZES WOMEN: 35-36 / 37-38 / 39-40 / 41-42

Ultra-lightweight, technical running socks manufactured to improve breathability and comfort while running.

All the expected benefits when running have been incorporated into the design of these socks. Its In & Out (without cut wire) and anatomical construction provides more comfort. An airy mesh has been positioned on the top of the foot to ensure good breathability. The construction of this sock also incorporates a support zone at the ankle to improve stability while running, and a light reinforcement at the toe level for more protection and comfort. Its medium tension will ensure good support from the sock throughout your activity. Finally, with its weight of 30.2g, this sock is the lightest in our range for a second skin effect.

SIZES UNISEX: 35-38 / 39-41 / 42-44 / 45-47 SIZES WOMEN: 35-36 / 37-38 / 39-40 / 41-42

Ultralight, thin and technical Socks for running. The Run anatomic socks is built for the comfort of your run.

All the essentials benefits expected for running have been integrated at the conception of the socks, breathability under the foot where the warmth is important, support of the ankle to prevent injuries and fatigue while running, "in and out" construction of the socks to avoid extra thickness between foot and insole for better sensation. Our expertise in feet helped us to design the synergy socks running line. Thanks to our feet database of 400 000 feet scanned, we were able to design a very precise and unique socks line to enhance the insoles benefits: stability and sensation.

SIDAS X

JON ALBON

THE STORY

"I wanted to have a sock where the important toe, the big one, was in its own pocket and the rest were in another. This would allow the big toe (...) freedom of movement to work properly."

"A year and a half past without any success before I got a message from the guys at Sidas. (...) It was a match made in heaven and we go to working on prototypes."

TFREE®

Grey / Black

SIZES UNISEX: 35-36 / 37-38 / 39-40 / 41-42 / 42-43 / 44-46 / 47-49

Ultra-lightweight, technical running socks manufactured to improve breathability and comfort while running.

Thin and technical socks designed with a separate section for the big toe, to improve comfort and stability during road races. The big toe plays an essential role in balance, alignment and propulsion. We developed T-Free® technology, with athletes like Jonathan Albon, to allow the big toes to move more freely and independently. All the expected benefits for road running have been incorporated into the design of these socks. The left foot / right foot anatomical shape, combined with the In & Out construction (without cut threads), guarantee greater comfort and a perfect fit for your foot. Polygiene fibers and air mesh positioned underfoot keep your feet cool and dry while the ankle support zone provides optimal support for a safe and stable run. The socks also have wide grip tape for improved grip as well as a reflective tape for good visibility, day and night

ANKLE

ANKLE UNISEX Grey / Black
CSORURTFRE24_GRBK
32824220

ULTRA LIGHT & THIN
The socks have a very thin design thanks to their Synergy Fit design and their technical mesh.

GREATER STABILITY
The T-Free technology incorporates a separate compartment for the big toe to restore its' biomechanical properties of movement, stability, and alignment.

IMPROVED GRIP
A wide grip band has been positioned on the sock to improve adherence between the insole/sock synergy.

COMPOSITION

- 90% Polyamide
- 4% Silicone
- 5% Elastane
- 1% Reflective yarn

Black / Grey

SIZES UNISEX: 35-36 / 37-38 / 39-40 / 41-42 / 42-43 / 44-46 / 47-49

Thin, technical and protective socks designed with a separate section for the big toe, to improve your comfort and stability when trail running.

The big toe plays an essential role in balance, alignment and propulsion. We developed T-Free® technology, with athletes like Jonathan Albon, to allow the big toes move freely and independently. All the expected benefits of trail running have been incorporated into the design of these socks. The left foot / right foot anatomical shape, combined with the In & Out construction (without cut threads) offers more comfort and guarantees a perfect fit for your foot. In addition, reinforcements on the toes, malleolus and heel protect your feet from impacts linked to the terrain. Polygiene fibers and air mesh positioned underfoot keep your feet cool and dry while the ankle support zone provides optimal support for a safe and stable run. The socks also have a wide grip tape for improved grip as well as a reflective tape for good visibility, day and night.

GREATER STABILITY
The T-Free technology incorporates a separate compartment for the big toe to restore its biomechanical properties of movement, stability, and alignment.

ANKLE PROTECTION
Protection zones have been added at the ankles for extra comfort.

IMPROVED GRIP
A wide grip band has been positioned on the sock to improve adherence between the insole/sock synergy.

Black / Blue

SIZES UNISEX: 35-36 / 37-38 / 39-40 / 41-42 / 42-43 / 44-46 / 47-49

Double-sided, technical trail running socks designed to reduce the risk of blisters and improve comfort during your trail run.

Trail runners are particularly prone to blisters due to distance traveled, wet conditions and varied support. To address this Sidas has developed a technical sock, alongside its athletes, with double construction, so that friction takes place between the two socks and not on the foot.

All the essential benefits expected for trail running have been integrated into the design of this double sock. The left foot / right foot anatomical shape, combined with the In & Out construction (without cut threads) offers more comfort and guarantees a perfect fit to your foot. In addition, protection zones positioned at the ankle, heel and toe protect your feet from impacts. Polygiene fibers and air mesh positioned underfoot keep your feet cool and dry while the ankle support zone provides optimal support for a safe and stable run. The socks also have a wide grip tape for improved grip as well as a reflective tape for good visibility, day and night.

Black / Red

SIZES UNISEX: 35-36 / 37-38 / 39-40 / 41-42 / 42-43 / 44-46 / 47-49

High definition and technical running socks designed to give you a better feeling when running due to their Synergy Fit construction.

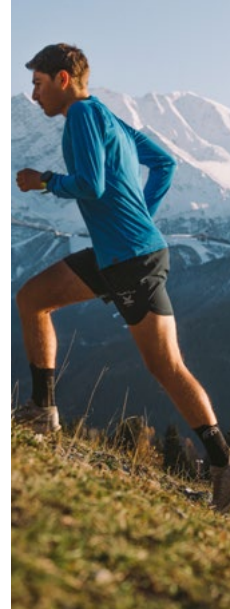

They are perfect for use on the road or on the trail, allowing you to enjoy better synergy with your soles. All the essential benefits required for running have been integrated into the design of these socks: aeration zone in the arch for better evacuation of perspiration, support zone in the ankle to improve stability and limit the risk of injury, 3 anti-slip grip strips to reduce instability and friction, reflective strip for greater visibility for your night runs. Designed with merino wool to ensure good warmth and moisture management for running in cold conditions. The socks also offer good odour management thanks to Polygiene technology. This treatment, which uses naturally occurring silver salt microparticles, prevents bacteria from spreading and growing, reducing odours from strenuous activity. The socks stay fresh and last longer (guaranteed to last at least 100 washes). Polygiene fibres have been tested by laboratories and are completely safe for the skin.

SIZES UNISEX: 35-36 / 37-38 / 39-40 / 41-42 / 42-43 / 44-46 / 47-49

High definition Running socks designed for long endurance. This socks is built to improve the sensation and the performance of the runners on long distance; the progressive calf compression will stabilize the muscle and help recovery.

The socks construction around the feet is very thin and strong to maximize the sensation of the foot with the insoles and so, the ground. The 3 gripping bands will ensure a high contact of the socks with the insoles of the shoe. The Synergy Fit construction, based on database of 400 000 feet will enhance the benefits of the insoles, stability and sensation.

ULTRA FIT LINE

ULTRA FIT

CONCEPT

- ③ The combination of our foot knowledge and the ultra runners of the Sidas Matryx Team lead us to a new socks construction dedicated to foot support on distance above your habit and ability.
- ③ On this distance, the muscular fatigue will make the foot collapse, the heel flesh will reduce, the foot will get longer and the metatarsals will get larger.
- ③ Our new Ultra fit Technology is built to compensate and support your foot for these fatigue symptoms, acting like an exo skeleton around your foot.

By becoming the title partner of Team Sidas-Matryx for the next 3 years, the third most successful trail team in the world after the giants Salomon and Hoka, we are making an even greater commitment to this high-level sport that inspires us every day.

Team Sidas-Matryx is one of the first professional groups in the fast-growing discipline of trail running. Made up of 7 of the world's most talented athletes, it works much like the top cycling teams, putting the runner at the centre of a dedicated performance ecosystem.

SIZES UNISEX: 35-36 / 37-38 / 39-40 / 41-42 / 42-43 / 44-46 / 47-49

The first sock designed to support the evolution of the foot over long distances.

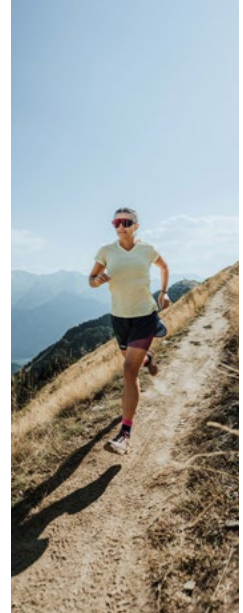

Technical, light and breathable ultra running socks designed to support the evolution of your feet during exercise. Indeed, over long distances, muscular fatigue causes the foot to sag and lengthen, the metatars to widen and the heel to become more sensitive. We have therefore developed a new range of socks, with the athletes of the Sidas Matryx team, which act like an exoskeleton to relieve the effects of muscular fatigue of the foot during long-distance races. All the essential benefits expected for ultra running were then integrated into the design of the socks: strapping at the heel and meta heads to prevent injury and fatigue, breathability of the foot (where heat is important) to avoid the accumulation of perspiration, 2 grip strips to improve the sock/sole synergy, In&Out construction for more precision and better sensations, reflective strip for more visibility during your night runs. The socks also offer good moisture and odour management thanks to Polygiene technology. This treatment, which uses naturally occurring silver salt microparticles, prevents bacteria from spreading and growing, reducing odours from intense activity. The socks stay fresh and last longer (guaranteed to last at least 100 washes). Polygiene fibres have been tested by laboratories and are completely safe for the skin.

ANKLE

ANKLE UNISEX Black / Yellow
CSORURULTR22_BKYE
325615100

METATARSAL HEADS/
HEEL SUPPORT:

Ultra fit technology, acting as an exoskeleton, has been developed to support the evolution of the foot over long distances and compensate for muscle fatigue. The socks have built-in heel straps and meta heads to prevent injury and fatigue.

IMPROVED GRIP:

2 wide bands of silicon yarn are added to the socks construction in order to improve the grip between the socks and the insoles.

OVERSIZED

BREATHABILITY the open mesh band offer ventilation and allow evacuation of moisture during the race.

COMPOSITION

- 58% Polyamide,
- 26% Multifilament Polyamide
- 9% Elastane
- 6% Silicone
- 1% Reflective yarn

FOOT PRODUCTS

FOOT CARE SOLUTIONS

FITTING SERVICES

IN-SHOE PADS

Sidas is launching In-Shoe Pads, a new range of gel products that provide a solution to everyday foot pain. These products can be slipped into your shoe to relieve the most frequent types of pain, such as heel pain, blisters, flat feet, etc.

GEL HEEL STRIPS

CFCFPHEELSTR18
313346101

These anti-slip heel strips prevent your feet from moving around inside your footwear. Used preventively, they will stop swelling, chafing and blisters.

- Pack par per / Supplied in box of 10
- One size
- Fitting: Position the gel anti-slip heel strips inside your footwear where the heel is located.

FOAM MET PADS

CFCFPMETPAD18
313332000

These foam met pads relieve tension in the forefoot, ensuring optimum comfort.

- Pack par per / Supplied in box of 10
- Sizes: S (36-39) ; M (40-43) ; L (44-47)
- Fitting: Remove the insole from your footwear and place the met pad in the centre of the insole towards the front.

GEL ARCH SUPPORTS

CFCFPARCHSUP18
313331000

These close-fitting gel heel cups absorb shocks all day long for optimum comfort. Specially shaped to fit round the heel, they prevent blisters and stabilise your feet, enabling you to enjoy your day or sporting activity to the full.

- Pack par per / Supplied in box of 10
- Sizes: S (36-39) ; M (40-43) ; L (44-47)
- Fitting: Insert the arch supports into your footwear where the arch of your foot is positioned. Clean your arch supports regularly with soap and water to ensure they remain in place.

GEL HEEL PADS

CFCFPHEELPAD18
313333000

These anti-slip heel strips prevent your feet from moving around inside your footwear. Used preventively, they will stop swelling, chafing and blisters.

- Pack par per / Supplied in box of 10
- Sizes: S (36-39) ; M (40-43) ; L (44-47)
- Fitting: Insert the heel cups into the back of your footwear. Clean your heel cups regularly with soap and water to ensure they remain in place.

GEL BONE SPUR PADS

CFCFPBONESPU18
313334000

These gel bone spur pads relieve heel pain. They also absorb shocks all day long for optimum comfort. They are easy to fit and will quickly become an essential part of your daily life.

- Pack par per / Supplied in box of 10
- Sizes: S (36-39) ; M (40-43) ; L (44-47)
- Fitting: Remove the insole from your footwear and place the met pad in the centre of the insole towards the front.

GEL HEEL CUPS

CFCFPHEELCUP18
313335000

These close-fitting gel heel cups absorb shocks all day long for optimum comfort. Specially shaped to fit round the heel, they prevent blisters and stabilise your feet, enabling you to enjoy your day or sporting activity to the full.

- Pack par per / Supplied in box of 10
- Sizes: S (36-39) ; M (40-43) ; L (44-47)
- Fitting: Insert the heel cups into the back of your footwear. Clean your heel cups regularly with soap and water to ensure they remain in place.

FITTING SERVICES

FOOT PROTECTION

Sidas Foot Protection offers targeted pain relief for sports people. These products are applied directly to the skin, preventing blisters, black toenails and overheating.

GEL TOE CAPS

ASKINGLTOECA17
111050000

Gel toe caps allow you to enjoy your sport to the full. Used preventively, they avoid nails turning black due to impacts in the shoe. In case of existing pain, they absorb impacts for instant relief. Washable, reusable silicone protectors.

- SIZES: XS (small toes) / S/M (36-40) / L/XL (41-47)
- Pack par per
- Adjustable length
- Delivered in box of 20 or per unit

x 2

GEL TOE WRAPS

ASKINGLTOEWR17
111051000

Gel toe sleeves allow you to enjoy your sport to the full. They ease pain caused by friction between toes and prevent corns and calluses.

- SIZES: S/M (36-40) / L/XL (41-47)
- Pack par per
- Adjustable length
- Delivered in box of 20 or per unit

x 4

GEL PLANTAR PROTECTORS

ASKINGLPLAPR17
111049000

Gel plantar protectors allow you to enjoy your sport to the full. Used preventively, they avoid inflammation, burns and blisters. In case of existing pain, they absorb impacts for instant relief.

- SIZES: S/M (36-40) / L/XL (41-47)
- Pack par per
- Anatomical Construction (right foot / left foot).
- Delivered in box of 20 or per unit

TOE PROTECTORS V2

CFCOSTOEPROT20
318292101

Apply the Silitene™-T protection for toes as soon as the first signs of friction appear in order to prevent the development of blisters. Thin and imperceptible thanks to their biomechanical construction, the protection is very long lasting so you can fully enjoy your activity.

x5

THICKNESS: 1 mm

FOOT PROTECTORS V2

CFCOSTOEPROT20
318292101

Apply the Silitene™-T protection to the friction area as soon as you feel overheating sensations, to prevent the development of blisters. Its biomechanical construction allows for long-lasting wear. Thin and imperceptible, it allows you to fully enjoy your sporting activity.

x5

THICKNESS: 1 mm

ESSENTIAL PROTECTOR KIT V2

CFCOSTOEPROT20
318292101

The Silitene™-T protection kit is your best ally when practicing a sporting activity. Apply the protection to the friction areas to ease the pain for instant comfort. Their biomechanical construction allows for long-lasting protection.

x5

x5

THICKNESS: 1 mm

FOOT PROTECTOR SHEET 2 MM

ASKINFOOTPROT14_02SH
36829701

The Silitene™ protection kit is your best ally when practicing a sporting activity. Apply the protection to the friction areas to ease the pain for instant comfort. Their biomechanical construction allows for long-lasting protection.

100x115 mm (2mm)

FITTING SERVICES

CREAM

Sidas is embarking on a new adventure by marketing a range of sports creams. This range is intended for Outdoor sports such as running, hiking or trail running and uses top-of-the-range natural ingredients. It consists of two products, an anti-chafing cream and a recovery gel with a cooling effect.

ANTI FRICTION CREAM

75 ML CFCCREANTIF17_75ML
75 ML 311063101

15 ML CFCCREANTIF17_15ML
15 ML 311064101

Anti-friction cream that prevents blisters. Protects, moisturises and revitalises. This cream has a protecting action, forming a film that boosts the skin's elasticity and defensive ability. Apply before sport by rubbing it in at length to areas prone to friction: feet, thighs, arm pits, nipples, etc.

- Shea butter, marine collagen, vitamin E, witch hazel extracts. Does not contain parabens or PEG. Contains natural preservatives.
- Not tested on animals / 99% natural ingredients

75 ML PACK OF 15
OR INDIVIDUALLY
15 ML PACK OF 25

RECOVERY CRYO

75 ML CFCRERECOV17_75ML
75 ML 311066101

15 ML CFCRERECOV17_15ML
15 ML 311065101

Provides rapid relief from injury: strained muscles, impact injuries, cramp, dislocations and bruising. The silicon and targeted essential oils act in synergy to produce a three-fold effect: relaxing, stress-relieving and repairing. Apply locally as soon as possible after injury. Repeat application if necessary.

- Organic silicon and essential oils (mint, peppermint, eucalyptus, rosemary, tea tree)
- 77% natural ingredients

75 ML PACK OF 15
OR INDIVIDUALLY
15 ML PACK OF 25

FOOTCARE KIT V2

CFCFOCAREKIT20
318293000

This foot-care kit protects and soothes your feet during sport from start to finish. It prevents blisters and friction, soothes impact in your shoes, avoids black nails and friction between the toes.

- 1 Anti Friction cream 15 ml / 1 Recovery gel 15 ml 2 Gel toe caps / 4 Gel toe wraps / 5 foot protectors v2

FOOT ORTHOSES

The Foot Orthoses range is designed to provide comfort and support for your feet, ankles, and joints. These products are great for prevention and recovery, limiting the risk of injury while practising sports.

HEEL HUG

CFCFPHEELHUG18
315271101

Offer your heel more cushioning and comfort! The Heel Hug exerts lateral compression on the heel, renewing its natural cushioning properties. Choose your preferred level of compression from the three options.

You can use it as you see fit: before, during or after exercise, for a minimum of one hour. This product offers improved comfort; it is not a medical orthosis.

110V 321479101

220V COUCHSHEEVAKIT2-L
220V 321478101

AN INNOVATIVE TOOL FOR BOTH BEGINNER AND EXPERIENCED BOOTFITTERS.

Sheeva is complete and easy to use, helping you save time and simplifying all shell molding operations, even the most complex.

The main axis can take several types of molding such as instep, toes, right boot and left boot, and it can rotate to make it easier to access all the tools.

Equipped with a central electronic control panel, the bootfitter can heat or cool the boot with a variety of cycles to control the time and the temperature for each system (up to four).

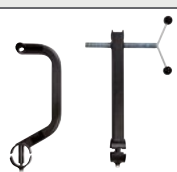

► Included the 4 types of déformations, and 4 cooling systems.

MEASURING THE FOOT

SIZES

A size is a series of measurements, expressed in points, that characterise a foot, last or shoe.

There are different size systems, each with its own history and logic: The Paris Point (EUR), the American Point (US) and the English Point (UK).

The Mondopoint (MP) system, resulting from work carried out by more than 18 countries and governed by international standard ISO 9407, has been created to harmonise the scales.

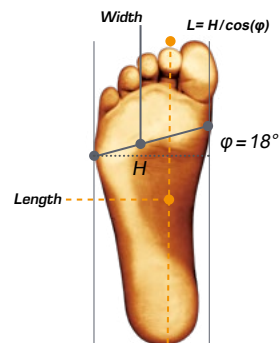

OPTION 1: FOOT SIZER

Measurement of the length and width of the foot
